This is one of a series of volumes presenting the findings of the 1933 Census of American Business. The statistics were collected in 1934 by a field canvass of wholesale establishments in every State, city, and county in the United States, with funds provided by the Federal Civil Works Administration. They cover the operations of wholesale establishments during the year 1933.

The volumes were prepared under the supervision of Fred A. Gosnell, Chief Statistician for the Census of American Business, by Theodore N. Beckman, in Charge of Wholesale Distribution, assisted by John Albright, Administrative Assistant.

WHOLESALE DISTRIBUTION: 1933

PLAN OF PRESENTATION

- Volume I.--Contains detailed statistics for the United States, together with brief summaries by States, cities, and counties. It also contains a description of the wholesale census, explanations of terms, classifications and tables, and an analysis of wholesale trade for 1933 as compared with 1929.
- Volume II.--New England States (Maine, New Hampshire, Vermont, Massachusetts, Rhode Island, and Connecticut).
- Volume III.--Middle Atlantic States (New York, New Jersey, and Pennsylvania).
- Volume IV.--Southeastern States (Delaware, Maryland, District of Columbia, Virginia, West Virginia, North Carolina, South Carolina, Georgia, Florida, Kentucky, Tennessee, Alabama, and Mississippi).
- Volume V.--East North Central States (Ohio, Indiana, Illinois, Michigan, and Wisconsin).
- Volume VI.--West Central States (Minnesota, Iowa, Missouri, North Dakota, South Dakota, Nebraska, Kansas, Arkansas, Louisiana, Oklahoma, and Texas).
- Volume VII.--Mountain and Pacific States (Montana, Idaho, Wyoming, Colorado, New Mexico, Arizona, Utah, Nevada, Washington, Oregon, and California).

WHOLESALE DISTRIBUTION: 1933

In this report are presented statistics on wholesale trade for the year 1933. Data are shown both by type of establishment and by kind of business so as to set forth the essential characteristics of the wholesale business of the area covered by this volume. For a description of the Wholesale Census, for definitions, explanations of terms, classifications, and United States Summary tables, and for an analysis of wholesale trade, see Volume I.

For census purposes a wholesale establishment is a place of business, the primary function of which is to sell or distribute goods on a wholesale basis. It may be in the form of a store, a wholesale warehouse, a sales or brokerage office, or part of an office as when the office is shared with other similar organizations. Sales at wholesale may be made to retailers, to institutions, to industrial consumers or to other wholesale organizations. No merchandising establishment has been classified as "wholesale" unless fifty percent or more of its sales were made in a wholesale manner or on a wholesale basis.

The Wholesale Census was taken on the basis of establishments rather than companies or firms in order to facilitate the canvass and to make it possible to present data by geographic areas. A separate report was required for each establishment regardless of whether or not it was owned or operated as a part of a large business organization. Wholesale peddlers and others who sell goods at wholesale but who maintain no regularly established places of business were not included in this census.

WHOLESALE TRADE, BY TYPE OF ORGANIZATION.--In presenting the data for the States and for the United States as a whole, wholesale establishments have been divided into six groups, some of which have been further subdivided, according to the type of establishment or the nature of the functions performed.

The first of the six functional type groups for which data are shown is called "wholesalers proper" and consists of more or less regular wholesalers in domestic and foreign trade who take title to the goods they buy and sell and are largely independent in ownership. The second division comprises "manufacturers' sales branches," consisting of wholesale outlets owned by manufacturers largely for the disposal of their own

goods. The third type, "bulk tank stations," consists of establishments performing wholesale functions in the distribution of gasoline, oil and other petroleum products. While primarily distributing their products to retail stations, they also sell goods at wholesale to tank wagons and to industrial users. The fourth type, "chain store warehouses," are distribution stations maintained by retail chains to supply their stores with merchandise. They carry on wholesale operations in addition to warehousing in that they break bulk, deliver and bill merchandise, and in some cases exercise supervision over a chain of stores. Wholesale commissaries, prepared-food depots which serve their own restaurants, and distribution centers for bakery chains are also included in this group.

The fifth division is called "assemblers and country buyers." Their principal operation is the purchase and assembly of farm products such as grain, cotton, tobacco and other forms of farm produce. This group also includes cooperative marketing associations; packers and shippers; cream stations; and independent, line, and cooperative elevators as differentiated from terminal elevators. The sixth and last group is called "agents and brokers," and includes auction companies, brokers, commission merchants, export and import agents, manufacturers' agents, selling agents, resident buyers, etc.

For each of the six type groups of wholesale establishments and for some of the subdivisions thereof data are shown in Table 1 on the number of establishments, both for 1933 and 1929; net sales, for 1933 and 1929; total expenses, expressed both in amounts and as a percent of net sales; the average number of full-time employees, pay roll for all employees and for part-time employees; and stocks on hand at the end of the year. This information is presented for each of the States and for each of the cities of 100,000 population and over.

WHOLESALE TRADE, BY KIND OF BUSINESS.--In addition to being classified according to functional type, each establishment was also classified by kind of business, on the basis of the chief line or lines of merchandise in which it dealt. Following this basis of classification, wholesale establishments were divided into twenty-five major kind-of-business groups, which were further subdivided into 166 detailed kind of business classifications according to the degree of merchandise specialization. A complete explanation of this method of classification is given in Volume I.

Important as it is to have information for each kind of business or line of trade in detail, it is even more significant to have such data presented separately for each type of wholesaling organization. In that manner the accomplishments of a wholesaler in a given line of business may be compared with the accomplishments of all wholesalers operating therein, while the achievements of a manufacturer's sales branch can be

compared with those of manufacturers' sales branches in the same line of trade. Such comparisons are of special interest to individual business enterprises and to the student of marketing.

Basic statistics on wholesale trade for types of establishments by kind of business are shown in two tables. Table 2A presents for each State and for a limited number of selected cities, the number of wholesale establishments by kind of business, in detail, for each of nineteen functional types of wholesale organizations. This table may be regarded as a supplement to Table 2B which shows for each of the States and for cities of 5,000 population and over, the number of establishments; net sales; total expenses, expressed in amounts and as a percent of net sales; the average number of full-time employees; pay roll, total and part-time; and stocks on hand. This information is shown for as many kinds of business, under each type, as possible without disclosing data for individual establishments. More complete information on the number of establishments by type and kind of business in detail is to be found in table 2A, described above.

SOURCES OF RECEIPTS.—In addition to dealing in merchandise, many wholesale establishments derive a certain amount of income from the sale of services and from other sources. Table 3 has been devised in order to measure quantitatively the volume of business secured through the sale of goods and that obtained from other sources. This table is presented for States only, by kind-of-business groups, and shows the number of establishments in a given group; total net sales, a term used throughout as interchangeable with receipts; total expenses, expressed in amounts and as a percent of sales; and receipts. The last item is broken down according to sources into sales of merchandise; receipts from parking, storage, cleaning, etc.; receipts from space rental; and receipts from other sources.

CREDIT BUSINESS OF WHOLESALE ESTABLISHMENTS.—The extent to which wholesale establishments engaged in selling on a credit basis is shown in Table 4. This information is presented for States only, by kind-of-business groups, separately for wholesalers proper and for all other types combined. It indicates the degree to which wholesale establishments perform the functions of financing business by extending credit to retailers, industrial consumers, and to other wholesale organizations to which they sell. Since some of the wholesale establishments did not operate on a credit basis and others failed to report on this item, data related to credit sales are presented in Table 4 only for those establishments for which the credit information was available. It shows the number of establishments reporting credit and the percent which that number constituted of the total for the kind of business under consideration. The same procedure is followed in connection with net sales.

In the following columns credit sales are given in amounts and as a percent of sales of establishments reporting credit sales and as a percent of sales of all establishments in a given group. The table also shows total expenses incurred by establishments operating on a credit basis. These expenses are given in amounts and as a percent of sales so that comparison may be made between the costs of doing business of establishments selling on credit with the costs incurred by those establishments which presumably do not operate on a credit basis, if it can be assumed that all or most of the establishments not reporting credit sales sold for cash.

DISTRIBUTION OF SALES.—A common conception is that wholesalers sell only to retailers and that wholesalers are the only type of organization operating in the wholesale field. That this is far from the truth is indicated by the figures shown in Table 5. The statistics therein are presented for States only, by 25 kinds of business, separately for wholesalers proper and for all other types combined. It shows that wholesale establishments sell to retailers, to industrial consumers, to ultimate or home consumers, and to other wholesale organizations. Naturally, there is considerable variation in the extent to which different types of wholesale establishments make use of these outlets and the degree to which they are used in the different kinds of business.

Here, too, not all of the establishments reported the distribution of their sales, partly because of inadequate records at the time the census was taken. The table shows for each type and kind-of-business group the number, net sales, and total expenses of all establishments, and then presents statistics for those establishments that reported a distribution of sales by outlets. For these establishments it shows the number and the percent which such number constitutes of the total for the group under consideration. Similar treatment is given to the net sales of establishments which reported their sales by type of customers. This is followed by total expenses for such establishments, expressed both in amounts and as a percent of sales. Total sales are then distributed into the following groups: sales to retailers (for resale); sales to home consumers (at retail); sales to industrial users, including institutions; and sales to other wholesale organizations. From these data it should be possible, among other things, to determine the amount of duplication in the total wholesale sales figures, due to the fact that some wholesale establishments sell to other wholesale organizations.

EMPLOYMENT IN WHOLESALE TRADE.—The significance of wholesale trade as a source of employment is indicated in Table 6. In this table the number of proprietors and firm members and the number of paid employees, divided into male and female and into full-time and part-time, are shown for each of the 25 major kind-of-business groups. The estimate by sex is based on the sex distribution reported for the total number of employees as of December 30, 1933; the percent of women shown separately relates to the same date. The table also presents the number of full-time and part-time employees as of the 15th of each month for each kind-of-business group, and a monthly index of employment for wholesale trade as a whole. This information is presented for each of the States and for cities of 500,000 population and over.

Employment is the only item in the wholesale trade statistics which is presented on a monthly basis. It affords indirect indication of the extent of seasonal change in wholesale activity, quite marked in certain lines of trade. A comparison of monthly figures for 1933 with quarterly data for 1929 suggests the extent of non-seasonal improvement in employment conditions in the course of 1933. Part-time employment in wholesale trade, information on which was gathered for the first time for 1933, appears to be much less important in this field than in retail trade; it attains significant proportions in only a few kinds of business.

WHOLESALE TRADE BY SIZE OF BUSINESS UNIT.—Table 7 presents the number of establishments, the annual average number of full-time employees, and the operating expense ratio of wholesale merchants and of manufacturers' sales branches with stocks*, by size-of-establishment groups, based upon net sales. Establishments have been classified into 7 size groups, as follows:

Group number	Net sales
I.....	Under \$10,000
II.....	\$10,000 to \$49,999
III.....	\$50,000 to \$99,999
IV.....	\$100,000 to \$199,999
V.....	\$200,000 to \$499,999
VI.....	\$500,000 to \$999,999
VII.....	\$1,000,000 and over

*For definition of wholesale merchants and manufacturers' sales branches with stocks, see Volume I.

This information is given by States for each of the 25 kinds of business. The table permits a comparison by lines of trade of wholesale merchants (including importers) with manufacturers' sales branches with stocks, two types of wholesale operations which, for the most part, compete in the same market, warehouse goods and make deliveries from stocks. Comparison is also possible of small and large-sized establishments in a given trade as to operating costs. It shows to what extent each size group furnishes employment in wholesale trade. It further indicates the differences existing between trade groups and between wholesale merchants and manufacturers' sales branches with stocks as to average size of establishment, as to distribution of establishments by size, and as to operating costs.

A FEW SUGGESTED USES OF THE DATA IN THESE REPORTS.--The statistics presented in these reports on wholesale trade should prove of considerable value to individual business men, public authorities and independent students. The breakdown by type of operation, line of trade, and geographic areas should enable the wholesaler to compare his accomplishments with those of others operating on a similar basis in the same market area. For the manufacturer planning a sales campaign the figures should make possible an allocation of sales quotas and territories to salesmen. The formulation of policies by public authorities should be facilitated by information on the amount and nature of business done in each locality, the employment it furnishes, and the income it distributes. The quantitative description of the marketing wholesale structure and of the changes in it in the course of the memorable years, 1930 - 1933, found in the Census volume, should serve as basic material to the analytical student of American economic life.

All other types	23	15	6,777	7,950	974	14.4	13.6	358	487	7.2	7	652

1/ Cream stations were not included - 1929.

2/ Includes 210 cooperative elevators with sales amounting to \$11,934,000.

3/ Inasmuch as no 1933 wholesale schedules were received for 271 establishments selling fresh farm produce in markets of Minneapolis and St. Paul, which were included in the 1929 census because their sales were largely on a wholesale plane, these figures have been eliminated from the 1929 data for comparison purposes.

1/ The increase in the number of establishments and net sales was due primarily to differences in methods of reporting some large chain organizations and to concerns which began operation subsequent to 1929.

2/ Cream stations were not included for the most part in 1929 data.

3/ Includes 280 cooperative elevators with sales amounting to \$14,912,000.

1/ The increase in the number of establishments since 1929 was due in part to differences in methods of reporting chain organizations dealing in petroleum.

2/ The decrease in the number of establishments since 1929 was due in part to loss of assemblers and country buyers of farm products.
